NOTES:

## **HISTORICAL SKETCH**

On Christmas Eve, 1890, Arthur Newby, Edward Fletcher and Glen Howe raised a capital stock of \$5,000 and incorporated the Indianapolis Chain & Stamping Company (ICSC) on December 24, 1890. Originally, the company manufactured bicycle chains to capitalize on the popularization of bicycles at the turn of the twentieth century. ICSC was located on the north side of South Street, between Meridian and Pennsylvania Street in Indianapolis. After moving to Senate Street in 1895, the company was relocated to its present location at the corner of Kentucky Avenue and West Street in 1918.

In 1899, the company became the Diamond Chain Division of the newly created American Bicycle Company. The Federal Manufacturing Company purchased the Diamond Chain Factory in 1901. Lucius M. Wainwright, General Manager of the Diamond Chain Factory, purchased the company in 1905 and renamed it the Diamond Chain & Manufacturing Company. He and his son, Guy A. Wainwright, remained in a leadership role for almost fifty years before Guy sold his shares to American Steel Foundries, now known as AMSTED, Inc.

The father, son team guided the company through many trying times, including two world wars, countless labor disagreements, the Great Depression and many smaller recessions. The family lived in Noblesville and Guy graduated from Purdue University with a degree in Engineering, before serving in World War I. After his father's death in 1931, Guy became the leader of the company and served Diamond Chain in various capacities until his death in 1956.

Diamond Chain Company continues to be an important manufacturer of roller chains and the 'Diamond Chain' is known in the field for its superior quality and performance. Diamond Chain represents an important sector of the local economy and its products have achieved national and international historical significance, as the chains were used in the Wright Bros. Flyer and on military airplanes during World War II.

Items in Collection: Box 1

## SCOPE AND CONTENT NOTE

The majority of the Diamond Chain Company Papers consist of catalogues and technical product information. The collection ranges from the personal correspondence of the company's patriarchs Lucius M. Wainwright and his son, Guy A. Wainwright, to labor strife in the 1910s through the 1970s. The majority of the photographs are employee portraits that were featured in *Chain Gang* to highlight new hires, promotions and retirements. The collection includes the entire range of published employee newsletters and a majority of the published catalogues.

Much of the collection was unorganized, so generally, the materials were organized topically then chronologically. This method was used to structure the collection guide, except when similar titles were grouped together, regardless of date. The collection features all of the financial ledgers for the company from its founding in 1890 to 1962. There also are some materials regarding wartime production, promotional flyers, film reels and department photographs from the early years of the company.
